

INTERIORS

Welcome to the Landmark. You have just opened the page to a new type of experience. The Landmark is an up market office and residential complex. A place that assures exclusivity, elegance and class.

You will be impressed by the clean lines and simple beauty of the 45 ft. glass curtain wall at the entrance. Once inside your eyes are immediately attracted to the bronzed dome ceiling floating over the atrium. Above you are the mezzanine floors which occupy the lower three levels of the 12 storey property.

The next three floors of The Landmark have been specifically designed by architect Suchith Mohotti to house spacious offices set to a contemporary international design and style.

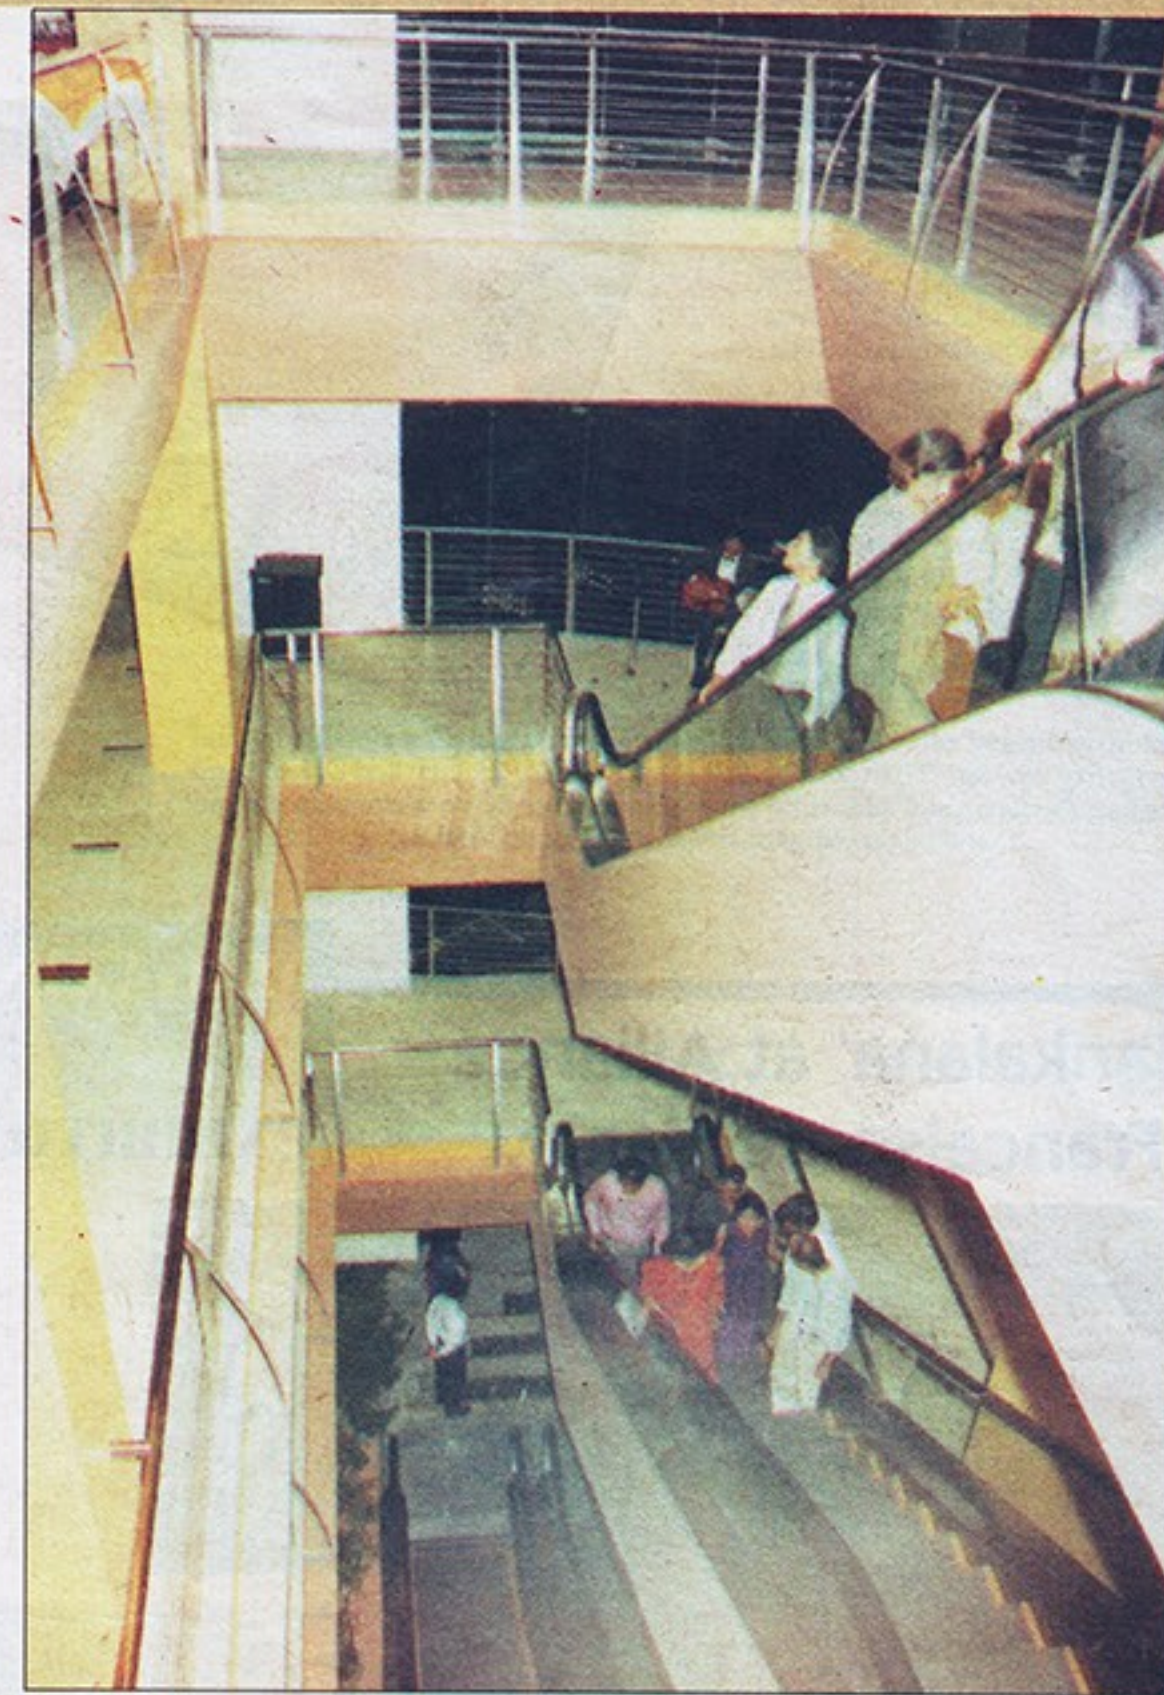

The upper four levels (7-11) of the property offer 16 luxury apartments. Each floor only houses 4 apartments to ensure privacy and a feel of luxury for all residents.

Finally, the rooftop penthouse and private gymnasium and lounge on the 11th floor are reserved for residents and offer a breathtaking view of the ocean and city.

The Landmark displays a distinct style of architecture with several unique design elements and materials like marble floors and mahogany doors.

Four escalators service the mezzanine levels while two private elevators cater to apartment and office tenants. The parking bays in the basement and above ground accommodate 65 vehicles and the convenience of being located midway between Kollupitiya and Bambalapitiya guarantees easy accessibility and high visibility.
